

## **CSR Activity for the Year 2015**

A devastating earthquake hit Nepal, near the capital city of Kathmandu, on 25th April 2015. It killed and injured thousands of people causing massive destruction to homes and infrastructure. The most dreadful thing is that a series of aftershocks follow the mainshock within weeks. This was one of the worst natural calamities in the history of Nepal, which left millions of people in urgent need of humanitarian assistance.

The employees of Vmoksha are keen to help improve lives and made personal financial contributions that assist in acquiring resources to the victims. All the employees together donated about Rs. 22,000 to provide financial assistance to the earthquake relief efforts.

We do pray for the earthquake victims and hope that the affected people will get back to the normalcy at the earliest. We continue our support through our CSR activities as long as the need exists.
